

# "Mining Drama Patterns in Dramatic Situations"

by Patrik Honišek, Valentino Vranic

Tuesday Oct 13 @ 6:00 am PDT

READ THIS LATER! IT WORTH.

It can even be POETIC!!!

"Solution to a problem in a context"

PATTERNS ARE ABOUT

A FLOWER CAN NOT BE DESIGNED UPFRONT BUT ONLY GENERATED FROM THE SEED.

DOMAINS LIKE DANCING OR MARTIAL ARTS ALSO USE PATTERNS FOR TEACHING. "COREOGRAPHY" IS A SEQUENCE!

Zumba with Mary Lynn at 2:30

IMPORTANT! DO NOT FORGET

DO NOT GET LOCKED IN JUST ONE DOMAIN!!!

PATTERNS INTRODUCTION bootcamp

TEMPLATE Gof? Alexander?

EACH PATTERN DEPEND ON OTHER PATTERN

they do not make total sense individually

quality without a name

BUILD SOMETHING PHYSICAL + SOCIAL

- Human well-being
- QWAN, wholeness, life, beauty
- Generativity
- Morality
- Patterns build something
- Mirror of Self
- Goal of Tears

MORAL CAPACITY TO BUILD

LIVING STRUCTURES

NOT MODULAR PARTS

Sequences & Scenarios for Fearless Change

Mary Lynn Manns, Fearless Change—USA  
Joseph W. Yoder, The Refactory, Inc—USA

This paper summarizes some ways to chunk the large collection of Fearless Change patterns in a way that helps readings learn, understand and use them. These include categories, illustrations, experiences, sequences, and scenarios. We offer these to our readers for evaluation, and ask what works, what doesn't, what more do we need?

NAME allow a high level conversation

- STORY
- CONTEXT environment where the solution works
- PROBLEM a question?
- FORCES why is it hard?
- SOLUTION a-ha!
- RESISTING CONTEXT with downsides
- RATIONALE why the solution works
- RELATED PATTERNS
- KNOWN USES
- SKETCH
- AUTHORS
- REFERENCES science

"I am a scientist."

Book 3: A Vision of a Living World

Having achieved a practical insight that tells us how unfolding works in the sphere of community building, physical building, and construction, my colleagues and I undertook a long series of experiments over a 30-year period, to find out to what extent these methods are feasible in practice, and what their effects are on people and people's individual and social well being.

Thanks, JOE! I feel you changed my life inviting me to this PLoP!

Strangler Patterns

Joseph W. Yoder, The Refactory, Inc.—USA  
Paulo Merson, Brazilian Federal Court of Accounts (TCU)—Brasilia, Brazil

Martin Fowler coined the term "Strangler Application" as a metaphor back in 2004 to describe a way of doing an evolutionary rewrite of a system, keeping it working while you evolve it. The main idea is to gradually create a new system around the edges of the old, letting it grow slowly over several years until the old system is strangled. The microservices architecture style has become very popular since 2014, and has been used to apply the strangler application to monolithic service-based systems. This paper describes different strategies (patterns) for applying the strangler application while evolving a monolith to use the microservices architecture style. The main ideas are: Wrap the monolith and protect services and system from change, Start Small and gradually evolve the system (baby steps), Pave the Road making microservices easier to create; Microservice first then split to Microservice, Add new functionality as microservices, Extract Module / Component to Microservice, and Replace functionality with Microservice.

Christopher Alexander
